

ELIVO

VERSATILE, POWERFUL AND RELIABLE

Elivo is a professional electronic harvester designed for the collection of olives and other fruits. With a lightweight and robust design, it is perfect for small areas and easily integrates with the use of the shaker motor. Available in different models, Elivo is designed to maximize the efficiency of harvesting, adapting to the different characteristics of the plants.

The fruits of the earth in good hands. Since 1967.
